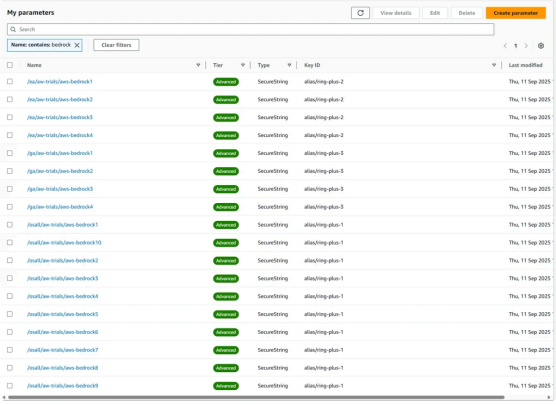
Followed the procedure mentioned in https://outsystemsrd.atlassian.net/wiki/spaces/RA/pages/4039704890/SRE+Managed+Static+Secrets#Per-Parameter sections "Per Parameter" and executed both AWS CLI commands for each of the requested parameters, associating with the correct ring KMS and RAM shared access. I won't paste the actual commands because those contain the secrets.

Validation on AWS console directly:

- Parameters created:



- Resource shares
  - Ring-plus1:
