# [Normal] RE Change - Routine Pegasus Pipeline Change

By Leandro Galrinho 33 Add a reaction

This Change is part of the Change Catalog RE Platform.

## 1. Summary

This article applies to routine changes to pegasus pipelines. This may include changes such as bug fixes, chores, non-breaking features concerning the pipeline scripts, and updates to the pipeline YAMLs.

## 2. Implementation Plan

1. PR(s) merged after approval and passing checks
   a. Changes should have been tested with a run of the pipeline in the Lab environment also
   b. Repo involved to show test evidence: https://github.com/OutSystems/pegasus
2. On merging to main the changes then have to be released through the release automation. Currently released to all rings simultaneously, does not impact ongoing pipelines.

## 3. Validation Plan

1. The health of the pipelines is monitored.

## 4. Rollback Plan

1. Build a new version of pegasus from a previous stable tag
