Delete runtime Metadata CRs without an AppDeployment (Negative Rings)

Key details

General | CAB Review | Maintenance & Operations

Special Procedure Guidelines

PLEASE DO NOT CLONE REQUESTS FOR CHANGE - if you do it, automations will not be triggered and wrong information from the origin RFC will be replicated wrongly to the new RFC.

Change risk	Low
Change Category	Add option

Description

Metadata CRs are not being deleted once an application is also deleted, this pollutes the runtime stamp triggering alerts and issues in the velero backup.
