Rollback runtime-operator to previous validated version in EA (failed bake)

Key details

General | CAB Review | Maintenance & Operations

Special Procedure Guidelines

PLEASE DO NOT CLONE REQUESTS FOR CHANGE - if you do it, automations will not be triggered and wrong information from the origin RFC will be replicated wrongly to the new RFC.

Change risk	Low
Change Category	Add option

Description

We need to rollback to a previous version of the runtime-operator. Query Engine will not receive DatabaseMigrationFinished events if the version that is deployed is not reverted.
We are going to fix this problem in the scope of another story, but we need to rollback as an intermediate solution.
The version to rollback to is DUV 1.0.24 (0.212.1038966)
