Description

Hi Teams,

In the context of the US RDCMCP-3242, before delivering this, it was necessary to check the information, such as Edition and Features/Entitlements, from the tenants already provisioned, because the rollout of the Second Phase of the Entitlements 2.0 will introduce new configurations related to Edition|Templates and the way the Entitlements value is defined.

In this RFC, we need to set the Edition that is missing in some of the tenants below, that is one of the group of changes documented in the US RDCMCP-3336:

```
uv run invoke apply-entitlements --ring dev --tenant-id 04e7717f-d937-
uv run invoke apply-entitlements --ring stage --tenant-id 7084e994-5be
uv run invoke apply-entitlements --ring stage --tenant-id 749307d9-a9d
uv run invoke apply-entitlements --ring test --tenant-id 29a35b7a-3a70
