Pegasus v2 Lambdas Changes - Fix Jira notifications error logs

Key details

General | Maintenance & Operations

Special Procedure Guidelines

PLEASE DO NOT CLONE REQUESTS FOR CHANGE - if you do it, automations will not be triggered and wrong information from the origin RFC will be replicated wrongly to the new RFC.

Change Category: Other Write Operation

Description

Summary

This fixes the error logging in the Pegasus to ensure exceptions are logged correctly instead of using a custom string.

Context

Currently, errors are logged with a default severity of Critical when a custom string is used instead of the properly formatted exception.

Acceptance criteria

- The error log must record the exception in the correct format.
- Logging should not default to a custom string.
- The severity level should accurately reflect the logged exception.
