Catalog Article - Upgrade Istio to 1.25.3

By Jeffrey Munoz 1 min 5 Add a reaction

Summary

GRS plans on upgrading to Istio version 1.25.3. The stamps use Istio as a service mesh.

General Information

Change Type	Normal
Change Risk	Medium
Downtime Involved	None
Rollback Available	Yes
Implementation Team	Global Routing and Security (GRS)
Component/Asset(s)	Istio
Impact Description	Istio manages our service mesh

Implementation Plan

1. Create Pull Requests with updated Istio control plane versions in the `configmaps` in the following stamps:

   c. Identity stamp
   d. Management stamp
   e. Forge stamp
   f. Universal stamp
2. Have ICE merge the stamp PRs
3. Release and wait for the new `configmaps` to reach Ring +3 GA (can take over a week)
4. Update Flux Networking Stack
   a. Update Istio default versions to the new version (1.24.6 → 1.25.3)
   b. Create a new Flux Networking Stack release

Testing and Validation Plan

1. Test deployment in local cluster before going to the rings
   a. Review all component versions
   b. Verify istiod is updated as expected to v1.25.3
2. Once in Ring Minus 3
   a. Review the Azure DevOps Pipeline output to verify the deployments
   b. Review Grafana Cloud logs
      i. Verify all Istio components are on the new version
      ii. Review `istio-cni-node` logs to the operator is working as expected
      iii. Review `istiod` logs to verify they are functioning as expected
   c. Review Grafana Cloud GRS Alerts Dashboard
   d. Test Portal logins by verifying you can log into the `eng-dev-us-10.outsystems.dev` tenant
   e. Review Ring Minus 3 End to End tests
      i. Verify Test results from before and after the upgrade in Ring Minus 3
   f. Review the output of `istioctl proxy-status`

If there is an issue:

1. Create Pull Requests in all the stamp repos, reverting the change.
2. Work with ICE to have the PRs merged.
3. Verify the previous version of Istio (1.24.6) is back on Ring Minus 3.
