Done

Improve Request For Change

Key details

General | CAB Review | Maintenance & Operations

Special Procedure Guidelines

PLEASE DO NOT CLONE REQUESTS FOR CHANGE - if you do it, automations will not be triggered and wrong information from the origin RFC will be replicated wrongly to the new RFC.

Change risk	Low
Change Category	Add option

Description

ROPS (RuntimeOperationsProvider.Service) was previously using NACK to create and manage NATS Jetstream resources (Stream + Consumer). We've migrated the service to create and manage resources following the implementation of ICE's NATS Cluster Operator. The last step of this migration is to delete the CRs that were created and managed by NACK.

This RFC covers the first phase described in the Catalog Article linked with the RFC.
